

HOW TO PREVENT WOOD FLOOR DAMAGE FROM UV RAYS

1

INSTALL CURTAINS OR BLINDS

Keep them closed when you leave your house for extended hours!

REARRANGE RUGS AND FURNITURE

Move your furniture around every once in awhile to avoid discoloration.

2

3

USE A FINISH WITH UV INHIBITORS

This is the best option to protect the wood floor long term.

CONSIDER SANDING AND RECOATING

See spots where the color has changed? Sanding & recoating can make your floor look like new!
