

WOOD FLOORS & YOUR HOME

ONE OF THE BEST WAYS TO KEEP YOUR HARDWOOD FLOORS LOOKING GREAT FOR YEARS IS TO KEEP YOUR HOME IN THE RIGHT ENVIRONMENT.

1

INVEST IN A WHOLE-HOME HUMIDIFIER

The best way to prevent gaps, squeaks, cupping, movement, and other issues is to have a humidifier running before, during, and after installation.

2

SET TEMPERATURE TO 60-80 DEGREES

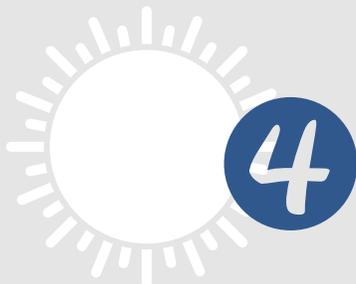

Staying at a consistent temperature will also prevent the floor from moving. Movement can cause gaps and squeaks.

3

KEEP YOUR RH LEVELS BETWEEN 35-55%

It's a good idea to get an inexpensive hygrometer to keep track of the temperature and relative humidity levels in your home.

4

AND TURN ON THE DEHUMIDIFIER IN THE SUMMER

Too much humidity is bad too! Be sure to turn your humidifier to the summer setting and turn on a dehumidifier if necessary to keep the RH levels between 35-55%.
