

WOOD FLOOR CLEANING GUIDE

WHAT YOU SHOULD USE TO CLEAN YOUR FLOOR

- ✓ MICROFIBER DUSTING PAD
- ✓ VACUUM OR BROOM
- ✓ MICROFIBER CLEANING PAD
- ✓ HARDWOOD SAFE CLEANER

THINGS TO AVOID

- ✗ WET MOPS
- ✗ STEAM MOPS
- ✗ SUPERMARKET OIL SOAPS, WAXES, AND POLISHES
- ✗ STRAIGHT OR DILUTED AMMONIA OR ALKALINE PRODUCTS

HOW TO CLEAN YOUR WOOD FLOOR

Remove dust and debris with the dry microfiber dusting pad, vacuum or broom.

ALWAYS TURN OFF THE BEATER BAR ON A VACUUM

Clean tough spots with a damp rag by hand.

Spray the cleaning solution across the area you are about to clean.

Mop with the microfiber cleaning pad. For large areas, rinse and clean, or swap out to a clean pad, as it becomes dirty.

Rinse the cleaning pad with warm soapy water or throw it in the washing machine.

WHEN TO CLEAN YOUR FLOOR

DAILY

High traffic areas like kitchens, hallways, entryways and living areas need the most attention.

RIGHT AWAY

Wipe up spills with a rag or paper towels.

Stains and grime will get harder to clean the longer you wait.

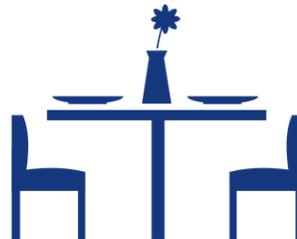

AS NEEDED

Low traffic areas can be cleaned as you see dirt and dust.

WEEKLY

Spray and mop once per week, or more when needed.

REMEMBER: ALWAYS USE A WOOD FLOOR CLEANER!

YOUR MAIN GOAL:

REMOVE DIRT AND DEBRIS THAT COULD DAMAGE YOUR FLOOR OR BE HARD TO CLEAN UP LATER

DO YOU KNOW WHAT KIND OF FINISH IS ON YOUR FLOOR?

This guide works for the majority of wood floors that are surface sealed.

For floors finished with a hard wax or penetrating oil, check with the flooring or finish manufacturer for which cleaning products are safe to use on your floor.
