

Fix the board, not the floor!

One of the best tools and skills you can have as a flooring professional is a good wood floor touch up kit, and the ability to fix problems that seem big to the homeowner, but are actually pretty isolated.

Protect your business, and ensure a happy customer by learning to fix small problems before they become big ones!

WAXES, MARKERS, ETC.

Waxes and putty can be used to fill in gouges, cracks, scratches, and nail holes. Colors can be mixed together to find the best match for your floor. Markers can be used to touch up small areas, add surface color to waxes and putty, or draw grain lines on filled areas.

- Hard-waxes
- Soft-waxes
- Epoxy putty sticks
- Prisma-color markers
- American-Craft metallic markers
- Sharpies
- Minwax Stain Pens
- Tibet Almond Stick
- Mineral spirits

TOOLS, ETC.

These are the tools you'll need to apply the waxes, putty, and other materials to repair hardwood floors.

- Plastic putty knife
- 5-way scraper
- Wire-brush
- Utility knife
- Stainless steel picks
- Bristle & foam brushes
- Buffing pads
- Rags
- Soldering iron
- WD-40

Fix scratches, gouges, cracks, nail holes, broken knots, color fade and more with a Wood Floor Touch Up Kit.

Find this list on Amazon.com and start building your Touch Up Kit today.
