

DO NOT

CLEAN YOUR WOOD FLOOR THIS WAY

ARE YOU CLEANING YOUR WOOD FLOORS CORRECTLY? FIND OUT THE TOP 4 OFFENDERS AND HOW YOU CAN CLEAN YOUR FLOORS THE BEST WAY.

1

SOAP AND MOP

Too much water will cause wood to swell. Use a microfiber mop instead to spread cleaner and wipe up messes.

3

STEAM CLEANERS

Wood does not do well with water and high heat. This can damage finish and cause the floors to cup. For tough marks and grime, use a wood floor cleaner instead.

2

BEATER BARS

Vacuums are great, beater bars are not. Always turn off the beater bar to avoid scratching and buffing the finish.

4

WRONG CLEANERS

- Furniture polish
- Oil soaps and waxes
- Ammonia
- Vinegar
- Alkaline products

Look for products made specifically for wood floors. We recommend Real Clean Floors and Bona cleaners.

SO HOW SHOULD I CLEAN MY FLOOR?

Here's some tips on how to keep them looking like new:

- Use a microfiber mop and wood floor cleaner
- Clean high traffic areas weekly
- Wipe up spills immediately with a damp cloth to avoid stains
